

SISK12: Calculate Attendance Totals

When do I create current grade cycles?

- After the End of 1st Quarter
- After the End of 2nd Quarter
- After the End of 3rd Quarter
- Last Day of 4th Quarter

Troubleshooting:

- The attendance totals figures the attendance for each quarter. The attendance will not import to the grade card until the attendance totals are run.
- Attendance will round to the nearest whole number.
